eCloudX WAF V1.2.7 ReleaseNote

1. Updated Linux kernel and python3-perf to 5.14.0-687.66.1.el9_8 to fix CVE-2025-39682

(tls: fix handling of zero-length records on the rx_list)

```
[root@ip-172-31-41-158 detection]#
[root@ip-172-31-41-158 detection]# rpm -q --changelog python3-perf | grep CVE-2025-39682
- selftests: tls: add tests for zero-length records (Sabrina Dubroca) [RHEL-114324] {CVE-2025-39682}
- tls: fix handling of zero-length records on the rx_list (Sabrina Dubroca) [RHEL-114324] {CVE-2025-39682}
[root@ip-172-31-41-158 detection]#
[root@ip-172-31-41-158 detection]# rpm -q --changelog kernel | grep CVE-2025-39682
- selftests: tls: add tests for zero-length records (Sabrina Dubroca) [RHEL-114324] {CVE-2025-39682}
- tls: fix handling of zero-length records on the rx_list (Sabrina Dubroca) [RHEL-114324] {CVE-2025-39682}
```

2. Updated OS packages to the Rocky Linux 9.8 baseline

(applied security and bug-fix updates from the Rocky Linux 9.8 repositories)

3. Updated the bundled Java runtime (OpenJDK) to Amazon Corretto 17.0.21.1 (build 17.0.21.1+2-LTS)

(applied the OpenJDK 17 security update released on 2026-11-17)
